Broadcast Video Expo was a huge success for both exhibitors and attendees. Holophone was represented by Canford in their booth, an exciting partnership that sees Canford carrying the Holophone line-up of microphones. The booth was abuzz with interested attendees looking for simple and effective means of surround sound capture.

Presented front and centre was Holophone's Portable line up of microphones that allow HD DSLR users and two track recorders to capture 5.1 surround sound in Dolby ProLogic II format. The ease of use was a hit as well as the low price point for prosumers and professionals alike.
