For the past three years the largest wakeboarding festival in the world has taken over Toronto's Centre islands and pushed the islands 35,000 person capacity to the limits.

Wakestock features more then just wakeboarding. Attendees can find everything from skateboard parks and moto x jumps to bikini contests and energy drinks n this self contained village of extreme sports.

The Holophone H4 SuperMINI can be seen recording all the action from the main stage and the excitement on the water. The camera mountable H4 SuperMINI makes jumping from event to event a snap and eliminates the need for repeated setups.

The H4 SuperMINI stays right on the main camera and records ultra realistic Dolby Pro Logic II surround sound. Bringing the experience of the festival to your friends at home.
